Made in the UK

Ideal for cutting:-

- Acrylic (score and snap)
- Cardboard
- Corrugated plastic
- Foamboard
- Polystyrene
- PVC foamboard
- Banner
- Fabric/textiles
- Film
- Paper
- Self adhesive vinyl
- Magnetic sheet

The Trimalco Nemesis means you can now have the functionality of the Trimalco Europa cutter rail, table mount and elevators all in one unit.

The Nemesis consists of a fixed docking station that fastens with screws to an existing flat table surface. The cutter rail can simply be lifted off the base and stored or used as a portable cutter rail. An integral lift mechanism on each end of the unit allows for easy material loading. The full-length aluminium base extrusion incorporates a narrow groove that safely accepts the blade tip during cutting, avoiding damage to the table top. Three full length silicone grip strips, two on the cutter and one on the base aid clamping and provide essential protection for sensitive surfaces.

The cutting head, which is common to all Trimalco cutter rails, includes a magnetic blade magazine which accepts standard utility blades and standard scoring blades.

A 45mm textile cutting wheel and holder is also included as standard.

The unique lightweight design of the rail extrusion provides an inbuilt rigidity allowing the Nemesis to span widths in excess of 5 metres.

The Nemesis is designed to mount onto your existing table or to the optional EUROPA table. Either way, you will create a complete cutting station capable of cutting materials up to 20mm - 3/4".
